SITE PLAN

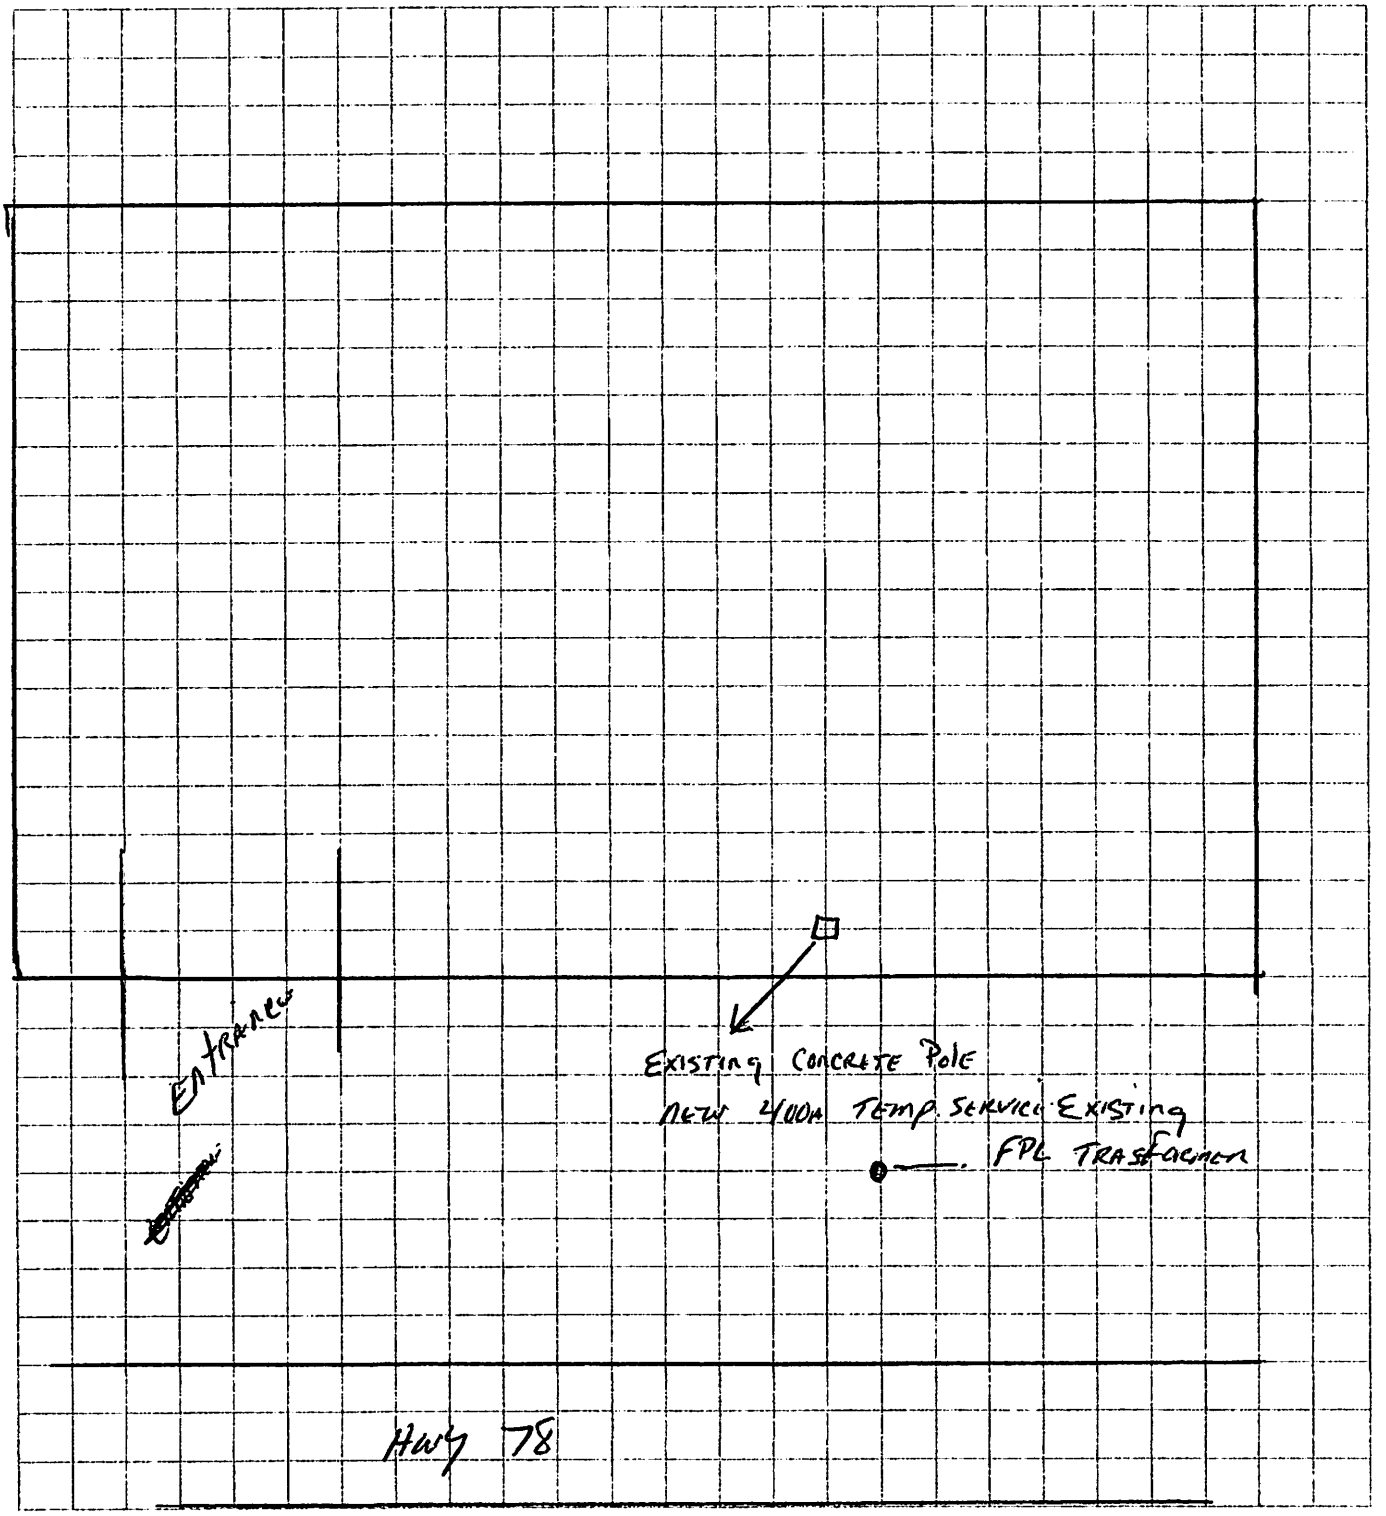

A site plan is required for any project that creates or expands any structure. Existing structures must be show on the site plan and indicate the location, square footage and distance to other structures on the property. When applicable, the location of the well and septic system must be show. The drawing must also show adjacent roads, the distance to property lines, of the proposed construction. The new construction must be indicated on the site plan showing the shape and orientation. If the construction is close to a required setback line, a survey may be required.
